CELEBRATED COLLECTION
OF
SEEDLING ORCHIDS

RAISED BY
CHARLES WINN, ESQ.

THE UPLANDS, SELLY HILL, BIRMINGHAM,

Also containing Plants with Seeds visibly Germinating
and Small Seedlings growing on the Pots.

1894

PURCHASED AND OFFERED FOR SALE

BY

Messrs. Charlesworth & Co.,
HEATON, BRADFORD.

THE COLLECTION

IS ON VIEW AT OUR NURSERIES

And all Orders will be taken in strict rotation.

In sending orders by Post or Telegram, it will be sufficient
to quote number in Catalogue.

TELEGRAPHIC ADDRESS :—

“CHARLESWORTH, HEATON, BRADFORD.”

The Gelly Hill Collection of Seedling Orchids.

We are pleased to be in a position to offer this wonderful lot of Seedling Orchids, which is no doubt, the most extensive and complete Collection ever offered for sale.

MR. WINN has devoted many years of labour and much study in raising these plants, sparing no time or expense in buying and selecting exceptional varieties for Hybridising purposes.

We have carefully Catalogued and described these Seedlings from the records made in MR. WINN's books kept for the purpose, and which all intending purchasers are welcome to see.

To make the size of the plants clear, we have given the exact measurement, so that anyone not able to come and view the Plants, can purchase with confidence; all the Plants are healthy, clean, and vigorous.

The plants with seeds germinating on the pots will be packed with exceptional care.

We have priced these Seedlings as reasonably as we did the General Collection of Plants, and have no doubt that our customers will find these Choice Plants a very interesting purchase.

The entire Collection is offered.

Presented to the L. H. Bailey Hortorium
by the Missouri Botanical Garden, 1972.

EXTRACTS.

The *Orchid Review*, September, 1894, says Hybridisation is carried on extensively and in a systematic fashion. At first many difficulties were encountered, but they were gradually overcome, and now Mr. WINN is reaping the reward of his perseverance. Over 2,000 Seedlings of various kinds are in existence, to say nothing of those germinating and not potted up—in fact, one block alone contains over 1,200 nice little Plants, which will probably yield some surprises in the future.

“Several good things have already flowered. Our readers will remember the fine *Cymbidium* x *Winnianum* (*C. giganteum* x *C. eburneum*) which was figured at page 361 of our last volume. Then there is the handsome *Dendrobium* x *Nestor*, whose portrait appears on a later page; *Cypripedium* x *Edith Winn* (*C. Stonei* x *C. Purpuratum*), of which only a single Seedling was raised; *C. x Cleopatra* (*C. Hookeræ* x *C. Oenanthem Superbum*); *C. x The Duke* (*C. Stonei* x *C. Barbatum Grandiflorum*); *C. x Ensign* (*C. Harrisianum* x *C. Barbatum*); *C. x Psyche*, a hybrid between *C. Bellatulum* and *C. Niveum* (which was thus not correctly recorded at page 223 of our last volume); and one or two others which do not seem to have been recorded. Then there are some Seedling *Calanthes*, and some of the earlier hybrids which have also been raised here, among them *Thunia* x *Veitchiana* and *Cypripedium* x *Calypso*, a particularly fine form. *Cypripedium Chamberlainianum* has been utilised for hybridisation, and Mr. WINN has Seedlings between it and *C. Stonei*, *C. Superbicum*, and *C. x Lecanum*.

“Here are some healthy Seedlings raised from *Cypripedium* x *Harrisianum Superbum* crossed with *C. Sanderianum*, all of which have veined leaves, mostly light coloured, though one is very dark. Others raised from *C. Rothschildianum* crossed with *C. Niveum*, will probably prove good when they reach the flowering stage.

“Another promising hybrid is *C. Niveum* crossed with *C. x Oenanthem Superbum*, which we may expect to hear of again. An attempt has been made to get an improved white *Selenipendium*, after the style of *S. x Cardinale*, by crossing *S. x Sedeni Candidulum* with the pollen of a fine *S. Schlimii Albiflorum*, and a good healthy capsule has developed.

“Turning to *Cattleyas*, we find a variety of interesting crosses, and among them one from *C. Dowiana Aurea* crossed with *C. Warscewiczii*, an experiment made for the express purpose of obtaining the splendid *C. Hardyana*, as we advised in these columns some time ago. Seedlings from *C. Bowringiana* crossed with the old *C. Labiata* are promising, as both are Autumn bloomers, free growers, and in every way likely to unite together.”

DENDROBIUM SEEDLINGS.

Lot		£	s.	d.
1	Findlayanum x splendissimum grandiflorum. Grand plant, with 6 fine bulbs, 2 of which are new, 10 inches long, and should flower next year	3	3	0
2	„ Grand plant, with 4 bulbs, 1 of which is new, measuring 15 inches long, should flower next year	2	12	6
3	„ Fine plant, with 6 bulbs, 1 of which is new, measuring 13 inches long, should flower next year	2	12	6
4	Nobile nobilius x Ainsworthii roseum. Grand plant, with 4 fine bulbs, measuring 2 to 8 inches long, strong young growth, 4 inches long, still growing, should flower next year	3	13	6
5	„ Fine plant, with 4 fine bulbs, measuring from 1 to 10 inches long, and still growing	3	3	0
6	„ Fine plant, with 3 strong bulbs, measuring 2 to 7 inches long, one of which is new	2	2	0
7	„ Small plant, with 3 bulbs, 2 inches long, 2 leads...	1	1	0
8	Aureum x nobile Cooksonii. Grand plant, with 3 fine bulbs, $\frac{1}{2}$, $2\frac{1}{2}$, and 7 inches long	5	5	0
9	„ Fine plant, with 3 strong bulbs, measuring $\frac{1}{2}$, $2\frac{1}{2}$, and 5 inches long	4	14	6
10	„ Fine plant, with 3 bulbs, $\frac{1}{2}$, 2, and $2\frac{1}{2}$ inches long	2	12	6
11	„ Good plant, with 3 stout bulbs, $\frac{1}{2}$, 1, and $1\frac{1}{2}$ inches long	1	15	0
12	„ Two good plants, with 2 bulbs, $\frac{1}{2}$ and 2 inches long	1	5	0 each
13	„ Two small plants, with 3 small bulbs each	0	7	6 each
14	Crassinode x aureum. Fine plant, with 2 bulbs, $\frac{1}{2}$ and $1\frac{1}{2}$ inches long...	1	11	6
15	„ Fine plant, with 3 bulbs, $\frac{1}{2}$, 1, and $2\frac{1}{2}$ inches long	1	11	6
16	„ Nice plant, with 3 bulbs, longest 1 inch, with a seedling Thunia growing on the pot	1	5	0
17	„ Nice plant, with 2 bulbs, $\frac{1}{2}$ and $2\frac{1}{2}$ inches long	1	1	0
18	„ Five small plants, with 2 bulbs each	0	10	6 each
19	„ Two good plants, (in one pot), with 2 and 3 bulbs each, largest bulb $1\frac{1}{2}$ inches	1	11	6
20	„ Two pots, with 2 nice plants in each; per pot	1	1	0
21	Wardinum album x Aureum. Two fine plants, with 3 bulbs each, longest $2\frac{1}{2}$ inches	2	5	0 each
22	„ Two good plants, with 2 bulbs, longest bulb $1\frac{1}{2}$ inches long	1	5	0 each
23	Suavissimum x Brymerianum. Nice plant, with 3 bulbs, one young growth	1	11	6
24	Nobile pendulum x heterocarpum phillipinense. Two fine plants, with 3 bulbs each, longest bulb measuring 4 inches long	1	11	6 each
25	„ Eleven fine plants, with 2 bulbs each, longest bulb measuring $2\frac{1}{2}$ and $3\frac{1}{2}$ inches long	1	5	0 each
26	„ Eight good plants, with 2 bulbs each, longest bulb $2\frac{1}{2}$ inches long	1	1	0 each
27	„ Four good plants, with 2 bulbs each, longest bulb measuring 2 to $2\frac{1}{2}$ inches long; another Dendrobium seedling on each pot	1	5	0 each

Lot		£	s.	d.
28	Parishii x macrophyllum. Fine plant, with 3 bulbs, longest bulb $2\frac{1}{2}$ inches	1	5	0
29	„ Fine plant, with 4 bulbs and new growth, longest bulb 1 inch ...	1	1	0
30	„ Five nice plants, with 3 bulbs	0	15	0 each
31	„ Two small plants, with 2 bulbs	0	5	0 each
32	Nobile Cooksonii x Findlayanum. Fine plant, with 2 fine bulbs 2 to $3\frac{1}{2}$ inches long	1	11	6
33	„ Six fine plants, with 2 good bulbs, longest bulb $2\frac{1}{2}$ inches long...	1	5	0 each
34	„ Seven good plants, with 2 bulbs, longest bulb measuring 2 inches ...	1	1	0 each
35	„ Ten nice plants, with 2 bulbs, longest $1\frac{1}{2}$ inches... ..	0	17	6 each
